This is a limited offer and will soon expire and revert back to the normal member price. Note: Please be aware older versions of the diagnostics may not test the Battery... Downloadable Software: Dell Digital Monitor KalibrierenHi I have a Dell xPS 15 LS902 with core i7 processor and windows 7. What seems to be the problem is that the computer seems to think there is more juice in the battery and registers the battery meter too high.. It is just over a year old Recently I find that the computer dies instantly when the battery meter runs down to about 42% or so.
